Grief > Suicide #21215 inÂ Books > Children's Books #23216 inÂ Books > Reference

Age Range: 1 - 4 years

Grade Level: Preschool and up

Customer Reviews

I have a daughter that was born hearing impaired. She is now 3 yrs. old. I purchased this book and others like it in order to learn simple sign and to also teach it to her. This book does a wonderful job of both describing and illustrating each and every sign in context. Of all the sign books I have purchased this ranks in the top five. It is a must have.

I really love this series. The way they are set up, it is easy to pick a few signs to learn here and there. And the pictures are so much fun and so vibrant that my babies love just looking at them for fun.

I have several books in this series. We love the artwork, clarity of images/instructions and variety of useful signs. Just wish there was a table of contents or index for easy reference, but the books are short enough that it's not a major hindrance.

This is a sturdy board book with useful signs. I had previously purchased the My First Animal Signs

(Baby Signing). That book is similar but way too big for a baby/toddler. This one is just the size.

I have 2 others of the same book, different content. I love the fact that these are board books. They are wonderfully illustrated and have tons of very good and useful signs. My daughter knows over 60 signs and she loves each of these books equally. I wish all the signing books were board books made this well with great illustrations!

It is a very nice book with many useful signs and pictures to talk about with your child. When my son was a baby we used sign language with him and this book was one of his favorites. He is 4 now but still likes to go over this book from time to time.

I ordered these books for my 2 year old to help us communicate better. He's 5 now and still enjoys learning sign language!

This book is cute and informative. It is easy to read and the children enjoy the pictures. This book is a handy tool.
