Geometrie Et Theorie Des Groupes: Les Groupes Hyperboliques De Gromov (Lecture Notes In Mathematics) (French Edition)

Synopsis

The book is an introduction of Gromov's theory of hyperbolic spaces and hyperbolic groups. It contains complete proofs of some basic theorems which are due to Gromov, and emphasizes some important developments on isoperimetric inequalities, automatic groups, and the metric structure on the boundary of a hyperbolic space.

Book Information

Series: Lecture Notes in Mathematics (Book 1441)

Perfect Paperback: 165 pages

Publisher: Springer; 1990 edition (February 22, 2009)

Language: French

ISBN-10: 3540529772

ISBN-13: 978-3540529774

Product Dimensions: 6.1 x 0.4 x 9.2 inches

Shipping Weight: 12.3 ounces (View shipping rates and policies)

Average Customer Review: 1.0 out of 5 stars Â Â See all reviews Â (1 customer review)

Customer Reviews

The 1 star rating refers to the printing quality. This is a reprint of an old book which was scanned with very low resolution, so the pages look very ugly. A funny remark: that some handwritten notes were also scanned (see e.g. pages 19, 27). It seems that Springer haven't had the trouble to scan the book themselves, and they are just printing a pirate copy.
