Case Studies In Mathematical Modeling: Ecology, Physiology, And Cell Biology

Synopsis

Exposing readers to some of today's most exciting and progressive research topics, this diverse compilation of case studies illustrates the unifying role of applied mathematics throughout the biological sciences. Written by leaders in the field, the cases demonstrate how successful modelers have used mathematics to answer real biological questions and takes readers step-by-step through the entire analytical process - question, model formulation, analysis, results, testing, and interpretation. It offers a solid foundation in theoretical biology and unifies mathematical, biological and modeling themes, providing useful tools for thought for future projects. Each section concludes with a project and problems and indicates numerous directions for further research and questions. For researchers new to mathematical biology.

Book Information

Paperback: 416 pages

Publisher: Pearson; 1 edition (January 9, 1997)

Language: English

ISBN-10: 0135740398

ISBN-13: 978-0135740392

Product Dimensions: 6 x 1.1 x 9 inches

Shipping Weight: 1.3 pounds (View shipping rates and policies)
